 Laser Color

Printing tests on Z-Laser Color

Among the machines on which Z-Laser Color has been successfully tested and has demonstrated excellent runability and outstanding print results are the following:

- HP Color Laserjet 4600n
- HP Color 9850
- Xerox DC2045
- Xerox DC3535
- Xerox DC5270
- Xerox DC2060
- Xerox DC6060
- Minolta UTAX DCC 400
- Minolta DEVELOP QC 2000
- Minolta CF 2002
- Minolta CF 3102
- Konika/Minolta 8050
- Canon Digital Colour CLC 1180
- Canon Digital Colour CLC 3200
- Textronix Phaser 750
- Kyocera Mita KM C850D
- Kyocera Mita KM 2630PN
- Kodak NexPress 2100
- Xerox iGen 3
- Xeikon DCP320X, DCP32Millennium, DCP320D, DCP500D, DCP32UP, DCP50D, DCP32SEC (only 100gsm, scriptfiles available at Downloads)

This list is not intended to be exhaustive and is updated on a regular basis. If you are interested in how Z-Laser Color behaves on a machine that is not included in the list, please do not hesitate to get in touch with us.
