

Z-Release C1 + 2S

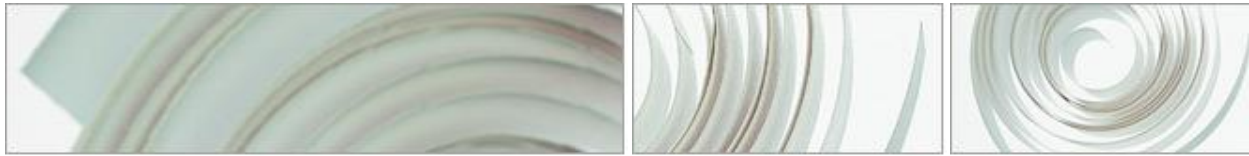

Silicone systems and typical application

Z-Release C1 + 2S	Silicone systems and typical application				
	Solventless	Solvent	Emulsion	UV	Typical application
90 g/m2	+++	++	++	+++	Labels, overlamination (foils)
100 g/m2	+++	++	++	+++	plasters, tapes, over lamination (foils)
120 g/m2	+++	+	++	+++	sign vinyls, plotter, prepreg process liner, tapes
135 g/m2	+++	+	++	+++	sign vinyls, plotter, tapes

+ Good

++ Very good

+++ Excellent

Application of Z-Release C1 + 2S

Product Performance

Both side coated symmetrical silicon base paper.
Allrounder with excellent dimensional stability.

Advantages

- **Silicone compatibility:** with all common systems (solvent, solventless, emulsion, UV-cured)
- **Good smoothness:** on both sides
- **Excellent layflat:** even at strong changes of temperature/humidity
- **Very good reel quality:** due to online coating/online calendaring

Fields of application

- Plotter vinyls
- Sign vinyls
- Pressure sensitive tapes/labels
- Prepreg process liner
- Plasters
