Application of Z-Bond

Product Performance

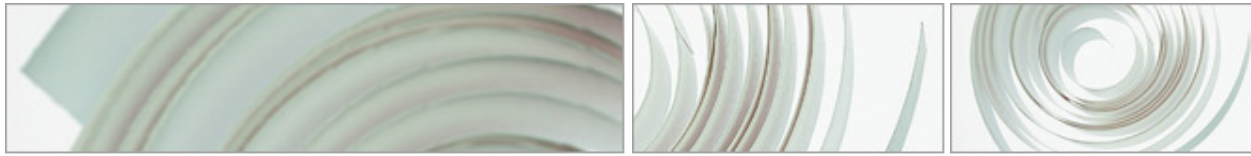

High bright Ink-Jet Paper for monochrome colour Ink-Jet Printing

IBM Ink-Jet Printing:

- Very good black densities
- Printing on both sides possible
- Smooth surface, excellent paper uniformity
- High brightness for good black -white contrasts

Application

- Manuals
- Bills

Application of Z-Plot 450

Product Performance

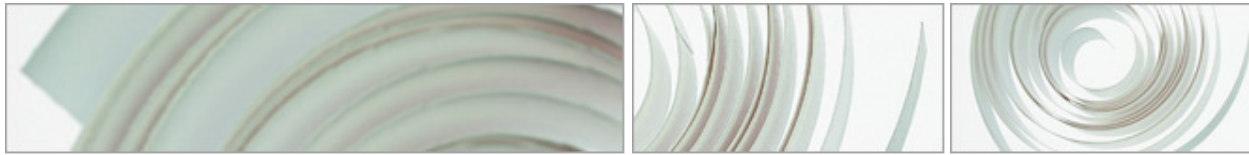

High bright Ink-Jet Paper for monochrome Ink-Jet Printing

IBM Ink-Jet Printing:

- Very good color densities
- Printing on both sides possible
- Smooth surface, excellent paper uniformity
- Outstanding opacity (56 g/m²)
- High brightness for good black -white contrasts

Application

- Manuals
- Bills

Application of Z-Plot 650

Product Performance

Outstanding paper performance used in high Speed Ink-Jet Printing, Cutting, Folding and Inserting.

IBM Ink-Jet printing:

- Excellent densities with colour inks.
- Immediately dry
- Printing on both sides possible
- High waterfastness
- Smooth surface, excellent paper uniformity
- High whiteness for excellent colour contrasts

Application

- Transactional Communication (1-4 color systems)
- Direct Mailing
- Folders
- Statements
